Education

Queens College, City University of New York   **Graduation - January 2025**

Bachelor of Science, Major in Computer Science

Work Experience

Software Engineering Intern, MNC Development   **February 2024 - Present**

- Leading a team of 7 software engineering interns in the development of a full-stack web application, collaborating closely with the design team to integrate user interface designs. Overseeing project milestones, ensuring timely delivery, and maintaining a focus on seamless functionality and a cohesive user experience.
- Conducting thorough and meticulous reviews of team members' pull requests, 148 to date , ensuring adherence to coding standards, identifying bugs, and providing constructive feedback to enhance code quality and team performance.
- Contributing significantly to producing the web application using React, Javascript for backend, and Firebase, applying my skills in these technologies to support the team's efforts and achieve project objectives.
- Implementing agile methodologies such as Scrum, conducting daily stand-ups and sprint planning sessions to enhance team collaboration and productivity.
- Introduced a streamlined backlog ticketing system within GitHub, optimizing workflow efficiency and enhancing project organization by centralizing task tracking, prioritization, and status monitoring.

Sports Media Founder, The Noise Media   **June 2020 - October 2023**

- Cultivated a dedicated following of over 25,000 members within the sports community through engaging podcasts and Instagram content.
- Drove a surge in monthly subscriptions, reaching a peak of $5,000, by strategically channeling followers into a Discord server.
- Coordinated content creation efforts as a lead producer, delivering high-quality film productions and captivating graphics using Adobe Illustrator.

Skills

React - Firebase - MySQL - SpringBoot - JUnit Testing - Three.js - Agile Methodologies - Adobe Creative Cloud - C++ - Swift - Android Studio

Projects

PhatBlack Web Application

- Designed and implemented user interfaces with React components to ensure a seamless and responsive user experience across various devices and screen sizes.
- Integrated Firebase as the backend infrastructure and database management system (DBMS) to store and manage user data, multimedia content, and application state in real-time.
- Leveraged Firebase Firestore, a NoSQL cloud database, to store and retrieve dynamic data such as user profiles, multimedia content metadata, and user-generated content.
- Conducted thorough testing and optimization of the application's frontend and backend components to ensure high performance, reliability, and scalability under varying user loads and network conditions.
